About Me

Three words to describe myself is active ,responsible ,and organized. I am keen on basketball since I love the feeling of growth with my team. I used to be a leader of the basketball team, which enhance my skills to communicate and collaborate with others.

I am a senior student now and have used some programming language like python, c++ ,JavaScript in my previous courses. It's amazing to make everything more efficient and convenient by coding. Building a website is really fascinating, my dream is to build a website that have clear interface and appropriate data structures. Therefore, both customer and Company can get benefits from it. I really hope to have a chance to devote myself to help and learn from your company.

Courses

Enterprise process improvement

Excel VBA

- Improve factory's operation of producing electronic shipping order by write Excel VBA code, which effectively saving 64% of the total monthly working hours of this operation.
